Use of cookies

Cookies are small information files that are automatically recorded on your computer's hard drive when you visit a website, and that include a unique identification number.

These cookies make it possible to simplify website access and browsing, and also increase the access speed and the ease of use. They can also be used to customise the website according to your personal preferences. Cookies also make it possible to analyse the use of a website to identify and remove any problems.

The configuration of most browsers allows you to accept or refuse cookies and be notified whenever a cookie is used. You are free to refuse these cookies, although this can hinder optimum browsing and the functionality of the website's services. Please consult the help function on your browser for more information. All the cookies assigned are automatically deleted at the end of a user session.
